

ABSTRACT**APPARATUS, IN PARTICULAR BOAT OR SWIMMING POOL, PROVIDED
WITH AN INFLATABLE ENCLOSURE EQUIPPED WITH AN INTEGRATED
ACCESSORY**

Apparatus comprising an inflatable enclosure (1) delimited by a flexible wall (2) to which an accessory (3) is secured: the wall (2) has an opening (4) defined by an edge to which a protruding reinforcement (5) is secured; two rigid frames (6, 7) straddle the edge of the opening (4) on each side of the wall (2), at least one frame comprising a groove (8) accommodating the reinforcement (5); clamping means (9) clamp the two frames against one another, trapping the reinforcement (5) in the groove (8); securing means secure the accessory (3) to a frame (6, 7); and leakproofing means (10) ensure that the accessory (3) mounted on the wall (2) is leaktight with respect to the fluid used for inflating the enclosure.
